

“Shubharambha”

For All Crops

We will have to understand the agro-climatic situation, the need of the time and will have to provide the right technical solution to solve the problems of all crops. Major problems in this situation are:

1) Improper development of white roots

Root development is essential for healthy and productive crop. Due to consistent use of chemical fertilizers the healthy root development is not possible and which reduces the yield drastically.

Hence, it is necessary to use our product “Gruda Gold Soil” for development of white roots.

2) Development of harmful and improper growth of useful organisms

Harmful organisms in soil cause diseases like wilt and non-development of useful organisms affect crop growth and yield.

Hence it is necessary to use “Kosmima Jeevan” to solve both the problems.

3) Requirement of non-chemical nutrients

In the Initial stage, these small plants need vital nutrients in non-chemical form as chemicals may damage the tender roots.

Hence it is necessary to use our product “Super Dinitro 19” for this purpose.

These Three products are essential in this situation and can be used individually as well as in combination.

For all Kharif crops, earlier use will give better results

Product	Purpose	Dose per Acre (43560 sq. feet)	Direction for use (can be used separately or in combination in 200 ltrs of water)
GRUDA GOLD SOIL	Development of healthy Root system and soil enrichment	1000 ml (1 litre)	Make solution in 200 ltrs of water and apply either through Drip irrigation or spray on the soil or drenching
Kosmima Jeevan	Growth of beneficial Organisms and Protection from Harmful organisms	500 ml	Make solution in 200 ltrs of water and apply either through Drip irrigation or spray on the soil or drenching
Super Dinitro 19	Organic Manure, essential nutrients for healthy growth	1000 ml (1 litre)	Make solution in 200 ltrs of water and apply either through Drip irrigation or spray on the soil or drenching

For Sucking Pests like leaf miner, aphids, jasids, thrips, white fly, red mites, mealy bugs, etc. (As per requirement)

Pestigone Suraksha	GoldSeal NeemSpreader		
 <p>20 ml in 15 litres of water 250ml in 200 litres of water</p>	 <p>40ml in 15 litres of water 500ml in 200 litres water</p>	Control of sucking pests	Foliar spray
